WHERE IT'S AT!

To Be Continued

3.

PROFESSOR PERVERDO add MAJOR CATASTROPHE and you have

"SPACE MEVANCE"

not misspelled

PROFESSOR PERVERDO

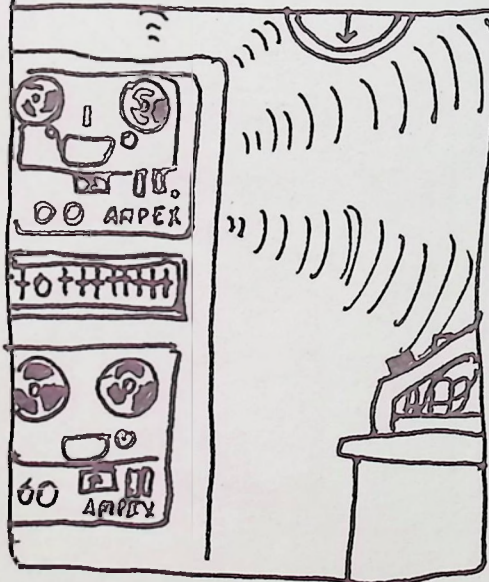

MAJOR CATASTROPHE

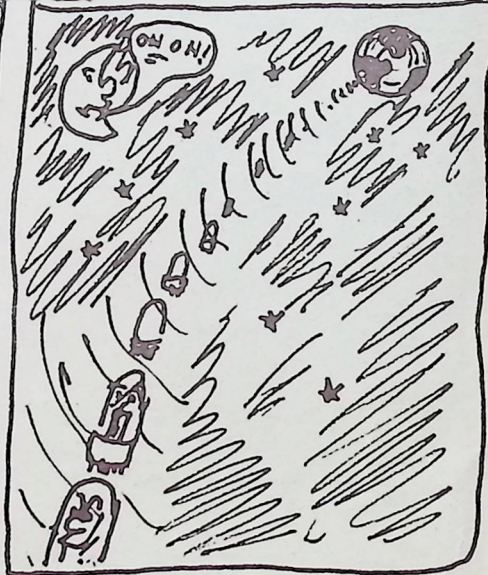

10:00 P.M. Prof. Perv. and Major Cairas. have just finished recording their Thursday night show "Songs That Never Made The hit parade."

Demonstrating once more their competence and attention to detail they inadvertently leave the equipment running. They depart, fearing nothing... Little do they know that their actions are about to unleash one of the most harrowing episodes ever at S.O.S.C.

3:10 A.M. The old Ampex Tape Deck starts oscillating and sends out high frequency electromagnetic waves. These waves travel billions of miles through space until...

ON the planet Xaviera in the Erogenos galaxy they encounter a willing reception in the energy hungry vacuumer. A perfect resonance connects them with earth and they travel towards us.

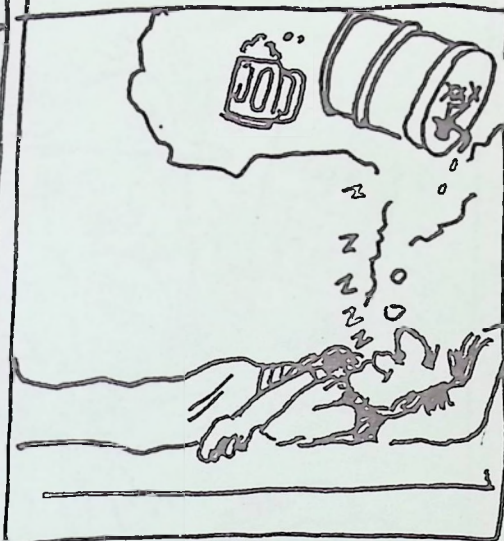

4.

Almost instantly they enter the studio through the deck, luckily the extra strain blows the fuses and only ten of the monsters have entered.

All right men, our moment is here! In just hrs. we can begin to take over earth by absorbing all the energy of the weak earthlings!

meanwhile the unsuspecting students sleep, dreaming of the days kegger at the lake

11:35 A.M. Dennis Sherwood enters the studio, prepared to do his 12:00 show. he is immediately surrounded...

HA, First we blind you, then we take the pulsating life force from your neural grid sys.

12:05 Ron Kramer, easy going station Director appears in the studio shouting frantically about being late until he sees Dennis.

All right Dennis, stop faking, get up Dennis!, Dennis?

5. Again they strike.

Unfortunately Ron didn't close the door and the Vacuum entered the hall, wasting people.

6. MEANWHILE... PERVERDO AND CATASTROPHE ARE PEACEFULLY sipping carrot juice in the harvester house. (Also known as Art Blumenkron and Andy Shields)

EDITOR'S note: The students are not dead only in a deep catatonic state. Their EEG. would show a 2cps. wave 20.05 microvolts on the most sensitive electroencephalograph.

THE DOOR BURST ASUNDER! (THAT'S NOT EASY BECAUSE THE DOOR WAS ALREADY OPEN)

7.

8.

one by one the creatures came in looking for their leaders
Again and again crashed down Andry's cane in his destructive
arc...

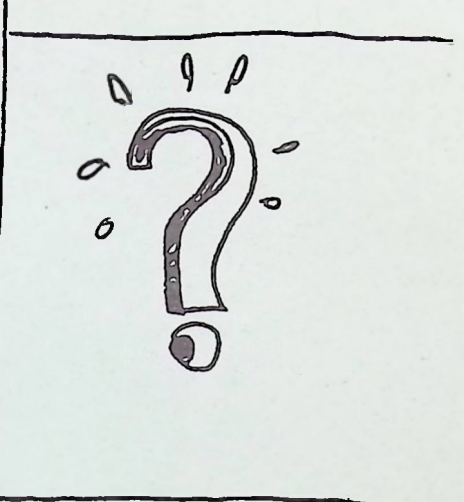

9. Later, as Catastrophe and Perverdo relaxed, by the way everyone affected by the tube men recovered, Perverdo was asking Catastrophe question about the day, in the Swedenburg house, the students had given them out of gratitude

THERE'S ALSO A SHOW ON Friday Night called "HOT FLASHES" with MARY ANN AND LIVE MUSIC

ON THE SHOW Litha Springs Special, you never know what will happen.

WELL ART, you know, when they're that big, you can hear em hum a mile AWAY.
